2. Claims 6, 16 and 21 are amended. Claims 1-5, 7-15, 17-20 and 22-27 are canceled. Claims 6, 16 and 21 are pending.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wendi Schepler (Reg. No. 43091) on 1/28/09.

In the Specification:

Please add the following new paragraph to the top of page 1 of the specification:

"This application claims the benefit of PCT Application No. PCT/SG01/00135 filed on June 28, 2001, the subject matter of which is hereby incorporated by reference in its entirety."

In the Claims:

Please replace claims 6, 16 and 21 with the following:

Claim 6:

A unitary portable biometrics-based access control device which can be directly plugged into a universal serial bus (USB) socket communicatively coupled to a restricted resource, the device comprising:

a housing;

a microprocessor housed within the housing;

a non-volatile memory coupled to the microprocessor and [capable of] configured for storing user data and having a minimum of 8 MB of capacity;

a USB plug integrated into the housing without an intervening cable and [capable of] configured for coupling the unitary portable access control device directly to the USB socket; and

a biometrics-based authentication module coupled to and controlled by the microprocessor, at least a portion of the biometrics-based authentication module being housed within the housing, wherein said biometrics-based authentication module is configured to grant access to the restricted resource provided that the biometrics-based authentication module authenticates the user's identity and wherein access to the restricted resource is denied to the user otherwise; and further wherein

said biometrics-based authentication module is configured to grant access to the user data stored in the non-volatile memory provided that the biometrics-based

authentication module authenticates the user's identity and wherein access to the user data stored in the non-volatile memory is denied to the user otherwise,

wherein the microprocessor is configured to provide a bypass mechanism for authentication upon a determination of authentication failure by the biometrics-based authentication module.

Claim 16:

A biometrics-based access control system for controlling access to a restricted resource, comprising:

a portable device which can be directly plugged into a universal serial bus (USB) socket communicatively coupled to the restricted resource and which includes

a housing;

a non-volatile memory housed within the housing and having a minimum of 8 MB of capacity;

a USB plug integrated into the housing without an intervening cable and [capable of] configured for coupling the portable device directly to the USB socket; and

a biometrics-based authentication module coupled to the non-volatile memory, wherein the biometrics-based authentication module is configured to (1) capture a first biometrics marker, (2) store the first biometrics marker in the non-volatile memory; (3) capture a second biometrics marker; and (4) determine whether the second biometrics marker can be authenticated against the first biometrics marker, and wherein access to the restricted resource is granted upon a determination of

successful authentication and wherein access to the restricted resource is denied otherwise,

wherein a bypass mechanism for authentication is provided upon a determination of authentication failure by the biometrics-based authentication module.

Claim 21:

A biometrics-based access control method for controlling access to a restricted resource and implemented using a portable device, the method comprising the steps of:

(a) directly plugging the portable device into a universal serial bus (USB) socket communicatively coupled to the restricted resource, wherein the portable device includes a housing; a memory having a minimum of 8 MB of capacity; a biometrics sensor; and a USB plug integrated into the housing without an intervening cable and [capable of] configured for coupling the portable device directly to the USB socket:

(b) obtaining a first biometrics marker from a user with the biometrics sensor of the portable device;

(c) retrieving a registered biometrics marker from the memory of the portable device, the registered biometrics marker having been stored therein during a registration process;

(d) comparing the first biometrics marker against the registered biometrics marker; and

(e) granting the user access to the restricted resource provided that a match is identified in said step (d), and

providing the user with a bypass authentication procedure provided that a match is not identified in said step (d).

***Allowable Subject Matter***

4. Claims 6, 16 and 21 are allowed.

The following is an examiner's statement of reasons for allowance:

As per claim 6:

The prior art on record either taken singularly or in combination fail to teach specifically *"a unitary portable biometrics-based access control device which be directly plugged into a universal serial bus socket communicatively coupled to a restricted resource, comprising a non-volatile memory coupled to the microprocessor and configured to storing user data having a minimum of 8 MB of capacity with a biometrics-based authentication module is configured to grant access to the user data stored in the non-volatile memory provided that is biometrics-based authentication module authenticates the user's identity and wherein access to the user data stored in the non-volatile memory is denied to the user otherwise, wherein the microprocessor is configured to provide a bypass mechanism for authentication upon a determination of authentication failure by the biometrics-based authentication"* including all the other limitations recited in claim 6.

Independent claims 16 and 21 have similar limitations as claim 6 and are therefore are also allowed for the same reason set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
